

PARAMINA CONTROLLER HP

Basic Display index/functions:

- Start button
- Stop button
- Reset button
- Operating pressure
- Operating temperature
- Running hours
- Service remaining hours
- Emergency stop button activated
- Temperature/pressure unit selection
- Safety valve test/leakage test process
- Automatic start/stop at the desirable pressure
- Pressure sensor (4-20 mA) and analog temperature sensor ensuring safety operation
- Thermo magnetic protection of the electric motor
- Warning of active carbon - molecular sieve element change
- Warning of oil change
- Recording of last 15 alarms/trips (malfunctions)
- Easy adjustment of all the parameters of the controller through a menu
- Incorporation of extra devices (interstage pressure sensors, voltage monitor etc.)

Basic Fault messages:

- Overpressure
- Overheating
- Motor overload
